

# List of countries by GDP (nominal) per capita

The figures presented here do not take into account differences in the cost of living in different countries, and the results vary greatly from one year to another based on fluctuations in the exchange rates of the country's currency. Such fluctuations change a country's ranking from one year to the next, even though they often make little or no difference to the standard of living of its population.

GDP per capita is often considered an indicator of a country's standard of living; <sup>[1][2]</sup> however, this is inaccurate because GDP per capita is not a measure of personal income.

Comparisons of national income are also frequently made on the basis of purchasing power parity (PPP), to adjust for differences in the cost of living in different countries. (see List of countries by GDP (PPP) per capita). PPP largely removes the exchange rate problem but not others; it does not reflect the value of economic output in international trade, and it also requires more estimation than GDP per capita. On the whole, PPP per capita figures are more narrowly spread than nominal GDP per capita figures.

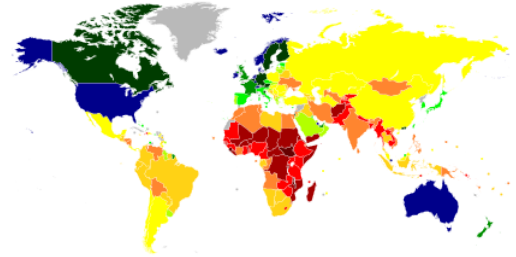

Non-sovereign entities (the world, continents, and some dependent territories) and states with limited international recognition (such as Kosovo, Palestine, and Taiwan) are included in the list in cases in which they appear in the sources. These economies are not ranked in the charts here, but are listed in sequence by GDP for comparison. In addition, non-sovereign entities are marked in *italics*.

Note that several leading GDP-per-capita (nominal) jurisdictions may be considered tax havens, and their GDP data subject to material distortion by tax planning activities. Examples include Bermuda, the Cayman Islands, Ireland, and Luxembourg. <sup>[3]</sup>

All data are in current United States dollars. *Historical data can be found here.*

## Table

The table initially ranks each country or territory with their latest available estimates, and can be reranked by either of the sources.

Countries or territories by GDP (nominal) per capita in 2023

GDP (in USD) per capita by country (including territories, and countries not included in the IMF report)

Notes:

- Data unavailable for the Falkland Islands, Gibraltar, Guernsey, the Holy See (Vatican City), Jersey, Niue, the Pitcairn Islands, Saint Helena, Ascension and Tristan da Cunha, Tokelau, and Western Sahara.
- Nearly all country links in the table (except that of Zanzibar) take to articles titled "Income in *country or territory*" or to "Economy of *country or territory*".

## Distorted GDP-per-capita for tax havens

Many of the leading GDP-per-capita (nominal) jurisdictions are tax havens whose economic data is artificially inflated by tax-driven corporate accounting entries.

For instance, the Irish GDP data above is subject to material distortion by the tax planning activities of foreign multinationals in Ireland. To address this, in 2017 the Central Bank of Ireland created "modified GNI" (or GNI\*) as a more appropriate statistic, and the OECD and IMF have adopted it for Ireland. 2015 Irish GDP is 143% of 2015 Irish GNI\*.

A stunning \$12 trillion—almost 40 percent of all foreign direct investment positions globally—is completely artificial: it consists of financial investment passing through empty corporate shells with no real activity. These investments in empty corporate shells almost always pass through well-known tax havens. The eight major pass-through economies—the Netherlands, Luxembourg, Hong Kong SAR, the British Virgin Islands, Bermuda, the Cayman Islands, Ireland, and Singapore—host more than 85 percent of the world's investment in special purpose entities, which are often set up for tax reasons.

—"Piercing the Veil", *International Monetary Fund*, June 2018<sup>[9]</sup>

Further discussion on this topic can be found in the [List of countries by GDP \(PPP\) per capita](#) article.

- List of countries by external debt

## Notes

- The European Union is included because it is far more than a **free trade** association such as **ASEAN**, **NAFTA**, or **Mercosur**. It has certain attributes associated with independent countries: its own **flag**, **anthem**, **currency** (for some members), **parliament** and other **law-making abilities**, as well as **diplomatic representation** and a **common foreign and security policy** when dealing with external partners. **However**, because the EU is an **organization** and not a **sovereign state**, it does not receive a ranking in this list.
- The name used by the IMF is the "**Taiwan Province of China**".
- Data are for the area controlled by the Government of the **Republic of Cyprus**.
- Figures for China exclude **Taiwan**, and the **special administrative regions** of **Hong Kong** and **Macau**.
- Figures exclude **special administrative regions** of **Hong Kong** and **Macau**.
- Excludes **Abkhazia** and **South Ossetia**.
- Excludes data for **Transnistria**.
- Figures exclude the **Republic of Crimea** and **Sevastopol**.
- The name used by the IMF and World Bank is the "West Bank and Gaza"
- The name used by the UN is the "State of Palestine".
- The UN figure excludes autonomous region of **Zanzibar**.
